Subject: rate payer advocate

As a citizen, I don't feel my interest is served by the Public Service Board or the DPS. Both appear to me to advocate for the governor's position which is the position on industry. We live in a time where corporations are people and money can buy elections so I understand why citizens are not served or the public interest or good advocated for.

I support the establishment of an independent advocate for rate payers for the public utilities.

thank you
