

Table of Contents

CHAPTER 1 - INTRODUCTION 1-1

 What is *Fueling Vermont's Future* All About? 1-2

 Highlights from Research and Policy Modeling..... 1-3

CHAPTER 2 - ENERGY USE AND HUMAN WELL-BEING: ENERGY GOALS FOR VERMONT'S FUTURE

 I. OUR GLOBAL ENERGY SITUATION 2-1

 II. OUR FUTURE ENERGY PATH: GOALS FOR VERMONT'S ENERGY USE..... 2-2

 A. Safety..... 2-3

 1. Air Pollution 2-3

 2. Extracting and Transporting Energy..... 2-4

 3. Nuclear Issues..... 2-4

 4. Summary..... 2-5

 B. Adequacy 2-5

 C. Reliability 2-6

 D. Security..... 2-6

 1. Diverse Energy Supply 2-6

 2. Local and Decentralized Energy Supply..... 2-7

 3. Nuclear Issues..... 2-7

 4. Sustainability 2-8

 5. Summary..... 2-8

 E. Sustainability..... 2-8

 1. Understanding Sustainability 2-9

 2. Non-renewable and Renewable Resources 2-9

 3. Energy and Use of Energy 2-10

 4. Biological Consequences of Energy Use 2-10

 5. Energy and Biological Impacts: An Example 2-11

 6. Conclusion..... 2-12

 F. Environmental Soundness 2-13

 1. Global Climate Change..... 2-14

 2. Acid Precipitation..... 2-15

 3. Air Pollution 2-17

 4. Water Resources 2-18

 5. Land Use..... 2-18

 6. Natural Ecosystems and Wildlife..... 2-19

 7. Recreation and Scenic Landscapes 2-19

 8. Nuclear Issues..... 2-19

 9. Summary..... 2-20

 G. Efficiency 2-20

 H. Affordability 2-21

 I. Economic Vitality 2-22

 III. PLANNING FOR VERMONT'S ENERGY GOALS 2-23

CHAPTER 3 - VERMONT'S ENERGY USE: PAST, PRESENT, AND FUTURE..... 3-1

 I. HISTORY AND BACKGROUND 3-1

 A. Energy Sources and Uses During Earlier Times 3-1

 1. Pre-1900 Energy Sources 3-1

 New Modes of Transportation and Expanding Uses for Coal..... 3-3

 Introduction of Manufactured Gas 3-5

 Early Electric Companies..... 3-5

 2. 1900 and Following: Major Energy Sources and Uses 3-7

 Coal, Oil, Kerosene, and Propane 3-7

Manufactured Gas and Natural Gas.....	3-8
Automobiles, Highway Transportation, and Gasoline.....	3-9
Growth of the Electric Utilities and Electricity Demand.....	3-14
Recent Energy Trends.....	3-23
B. Recent Energy Planning Efforts and Legislation.....	3-25
1. International Energy Efforts.....	3-25
U.N. Conferences on Environment and Development: Earth Summit.....	3-25
Conferences of the Parties to the Framework Convention on Climate Change.....	3-25
Intergovernmental Panel on Climate Change.....	3-27
2. National Energy Legislation.....	3-28
Clean Air Act Amendments.....	3-28
State Energy Efficiency Programs Improvement Act.....	3-29
Intermodal Surface Transportation Efficiency Act (ISTEA).....	3-29
Energy Policy Act.....	3-29
Climate Change Action Plan.....	3-30
Competition in the Electric Transmission Network.....	3-30
National Energy Policy.....	3-31
3. Vermont's Energy Legislation.....	3-31
Environmental Costs of Electricity Services.....	3-31
Establishment of State Energy Policy.....	3-32
Least Cost Integrated Planning.....	3-32
Policies Affecting Competition in the Utility Sector.....	3-32
Lawsuit Concerning Radioactive Nuclear Fuel Disposal.....	3-33
4. The State's Role in Energy Planning.....	3-33
State, Regional, and Municipal Planning (Act 200).....	3-33
The Vermont Department of Public Service.....	3-34
The Vermont Public Service Board.....	3-36
The Vermont Agency of Transportation.....	3-37
The Vermont Agency of Natural Resources.....	3-37
II. CURRENT ENERGY USE.....	3-39
A. Escalating Energy Use.....	3-39
B. Energy Use Among Sectors.....	3-40
C. Energy Use Among End Uses.....	3-41
D. Energy Use Among Fuel Sources.....	3-44
E. Non-Electric Fuel Sources.....	3-61
1. Petroleum Products.....	3-61
Future Trends and Issues.....	3-61
2. Motor Gasoline.....	3-66
Future Trends and Issues.....	3-66
3. Distillate Fuel (Heating Oil and Diesel Fuel).....	3-71
Future Trends and Issues.....	3-71
4. Liquid Petroleum Gas (LPG).....	3-72
Future Trends and Issues.....	3-72
5. Kerosene.....	3-74
Future Trends and Issues.....	3-74
6. Other Petroleum Products.....	3-74
Future Trends and Issues.....	3-75
7. Natural Gas.....	3-75
Future Trends and Issues.....	3-75
8. Wood.....	3-77
Future Trends and Issues.....	3-78
9. Coal.....	3-83
10. Solar.....	3-83
F. Electric Fuel Sources.....	3-83

1.	The New England Power Pool.....	3-85
2.	Vermont's Base Load, Intermediate, and Peaking Power Plants	3-86
3.	Vermont's Daily and Yearly Electricity Demand	3-87
4.	Recent History of Electricity Use	3-90
	Fuel Sources Used for Generating Vermont's Electricity.....	3-91
5.	Nuclear Power	3-105
	Future Trends and Issues	3-106
6.	Hydroelectric Power	3-110
	Future Trends and Issues	3-111
7.	Electricity from Coal	3-118
	Future Trends and Issues	3-118
8.	Electricity from Oil and Natural Gas	3-121
	Future Trends and Issues	3-121
9.	Electricity from Renewable Resources: Wood and Wind.....	3-123
	Future Trends and Issues for Wood Resources	3-124
10.	Electricity from Landfill Gas	3-126
	Future Trends and Issues	3-127
11.	Electricity from Waste	3-128
	Future Trends and Issues	3-129
12.	Utility Efficiency Programs	3-129
	Vermont's Utility DSM Programs	3-133
G.	Potential Energy Sources and Technologies for the Future	3-139
1.	Renewable Energy Sources	3-139
	Wind Power	3-142
	Solar Power.....	3-145
	Hydrogen	3-148
2.	Alternative Transportation Fuels	3-149
	Reformulated Gasoline	3-150
	Gasohol.....	3-150
	Oxygenated Gasoline.....	3-151
	Ethanol (CH ₃ CH ₂ OH, Ethyl Alcohol).....	3-151
	Methanol (CH ₃ OH, Methyl Alcohol).....	3-151
	Natural Gas.....	3-152
	Liquefied Petroleum Gas (LPG)	3-153
	Electricity.....	3-154
3.	Energy Technologies for the Present and Future	3-156
	Cogeneration.....	3-156
	Combustion Turbines.....	3-158
	Combined Cycle Plants.....	3-158
	Distributed Generation.....	3-159
	Energy Storage Technologies.....	3-160
	Fuel cells.....	3-160
H.	Current and Future Issues in Energy Use	3-162
1.	Full Cost of Energy Use	3-162
	Vermont's Experience with External Costs.....	3-165
2.	Increasing Competition and Restructuring in the Electric Utility Industry	3-167
	Vermont's Experience with Utility Restructuring	3-170

III. FUTURE ENERGY USE	3-172
A. Future Social and Economic Trends	3-172
B. Economic and Demographic Projections for Vermont	3-174
C. Base Case Forecast	3-175
D. Base Case Forecast Overview	3-178
E. Base Case Energy Projections	3-178
1. Energy Expenditures	3-179
2. Total Energy Use	3-179
3. Energy Use Among Sectors	3-179
4. Energy Use Among End Uses	3-180
5. Energy Use Among Fuels	3-180
6. Energy Intensity	3-180
7. Residential Energy Use	3-181
8. Commercial Energy Use	3-181
9. Industrial Energy Use	3-182
10. Transportation Energy Use	3-182
11. Total Air Emissions from Energy Use	3-182
12. Air Emissions among Sectors	3-183
13. Air Emissions among Fuels	3-183
CHAPTER 4 - ENERGY OPTIONS FOR VERMONT: POLICY ANALYSES	4-1
I. ENERGY SOURCES AND SUPPLY	4-3
A. Strategy: Promote Sustainable Use of Wood Energy	4-6
1. Policy: Promote Clean, Efficient Wood Burning with New Stoves	4-9
Impacts	4-12
2. Policy: Promote Commercial and Industrial Use of Wood Energy	4-12
3. Policy: Replace Vermont Yankee Power with Two-Thirds Wood Gasification	4-13
Impacts	4-14
4. Policy: Replace Vermont Yankee Power with Wood Gasification and Wind Power	4-17
Impacts	4-17
5. Policy: Renewable Portfolio Standard with Wood Gasification	4-20
Impacts	4-21
6. Policy: Renewable Portfolio Standard with Wood Gasification and Wind Power	4-24
Impacts	4-24
B. Strategy: Promote Wind Generated Electric Energy	4-27
1. Policy: Replace Vermont Yankee Power with One-Third Wind Power	4-29
Impacts	4-32
2. Policy: Renewable Portfolio Standard with Wind Power	4-35
Impacts	4-35
C. Strategy: Promote Use of Solar Energy	4-38
1. Policy: Shift Clocks Toward the Solar Day	4-39
2. Policy: Increase Solar Lighting and Heating Applications	4-40
3. Policy: Increase Solar Water Heating Installations	4-41
4. Policy: Promote Development of Photovoltaics and Encourage Their Use	4-42
D. Strategy: Support Appropriate Uses of Hydroelectric Power and Methane Sources	4-43
1. Policy: Support Appropriate Use of Hydroelectric Energy	4-43
2. Policy: Increase Appropriate Use of Landfill Methane Energy	4-45
Impacts	4-46
3. Policy: Increase Appropriate Use of Farm Methane Energy	4-49
Impacts	4-49

E.	Strategy: Reduce, Monitor, and Support Selected Uses of Traditional Fuels.....	4-52
1.	Policy: Reduce Use of Petroleum Energy and Establish Emissions Standards	4-52
2.	Policy: Reduce Use of Coal Energy.....	4-55
3.	Policy: Support Appropriate Use of Natural Gas Energy	4-56
4.	Policy: Monitor the Use of Nuclear Energy.....	4-58
F.	Strategy: Encourage Efficient Production and Distribution Technologies/Infrastructure.....	4-61
1.	Policy: Encourage Cogeneration.....	4-61
2.	Policy: Encourage District Heating and Cooling	4-62
3.	Policy: Encourage Distributed Utility Services.....	4-63
4.	Policy: Be Prepared to Act on Proposed Projects to Expand Gas Pipelines and Storage to Unserved Areas	4-64
5.	Policy: Investigate Feasibility of Rehabilitating and Reactivating Old City Gas Distribution Systems.	4-65
6.	Policy: Promote Integrated Electrical Utility Broadband Communication Networks	4-65
G.	Strategy: Increase Competition in the Electric Utility Industry.....	4-67
1.	Policy: Move Toward Greater Retail Competition While Maintaining Societal Benefits	4-69
H.	Strategy: Use Energy Taxation to Meet Vermont's Energy Goals	4-72
1.	Review Current Energy Goals and Energy Taxes and Assess their Consistency	4-73
	Current Energy Taxes in Vermont	4-73
2.	Tax Policy and Energy Policy.....	4-75
3.	Types of Energy Taxes	4-80
	Carbon Tax	4-80
	BTU Tax.....	4-86
	Motor Fuels Tax	4-87
	Energy Sales Tax	4-90
	Gross Fuel Receipts Tax	4-94
4.	Current Energy Tax Policies That Work Against Vermont's Energy Goals.....	4-95
5.	Concerns About Affordability and Other Impacts of Taxes	4-97
6.	Impacts of Energy Taxation Policies	4-98
	Impacts: Carbon Tax at \$100/Ton with Revenues Returned to Taxpayers	4-99
	Impacts: Remove Sales Tax Exemption on Motor Fuels with Revenue Returned to Taxpayers	4-102
	Impacts: Gross Fuel Receipts Tax with Revenue to Weatherization.....	4-102
II.	TRANSPORTATION	4-107
A.	Strategy: Least Cost Transportation Planning.....	4-110
	Energy, Transportation, and Least Cost Planning.....	4-110
	Shifting the Focus to Access.....	4-111
	Considering a Broader Scope of Transportation Options.....	4-112
	Employing Life Cycle, Full Cost Accounting	4-113
	Assessing the Cost-Effectiveness of Transportation Options.....	4-119
	Increasing Public Participation and Choice.....	4-120
	Versatility in the Planning Process.....	4-123
	LCTP Methodology	4-123
	Vermont's Current Transportation Planning Process	4-124
	Problems to Avoid	4-126
	Summary.....	4-127
1.	Policy: Consider Adopting the Principles of Least Cost Transportation Planning.....	4-127
	Impacts.....	4-128
2.	Policy: Consider Studying the Full Cost of Transportation in Vermont	4-129
	Impacts.....	4-130
3.	Policy: Develop a Demonstration Project for	

	Green Parking/Transportation Vouchers	4-130
B.	Strategy: Increase the Efficiency of Vehicles	4-132
	1. Policy: Increase Federal CAFE Standards	4-133
	Impacts	4-137
	2. Policy: Consider Adopting a 55 MPH Interstate Speed Limit	4-140
	Impacts	4-143
	3. Policy: Consider Stricter Enforcement of Highway Speed Limits	4-146
	Impacts	4-147
	4. Policy: Encourage Hypercar Development	4-151
C.	Strategy: Reduce Vehicle Miles Traveled	4-152
	1. Policy: Encourage the Use of Commuter Lots	4-154
	Impacts	4-155
	2. Policy: Shift VMT to More Efficient Modes -- Bus, Vanpool, and Train	4-156
	Bus Impacts	4-159
	Rail Freight Impacts	4-163
	3. Policy: Encourage Non-Motorized Transportation	4-163
	Impacts	4-166
	4. Policy: Encourage Telecommuting	4-169
	Impacts	4-169
	5. Policy: Encourage High-Density, Mixed-Use Land Use Planning and Curtail Sprawl	4-172
	Impacts	4-178
	6. Policy: Pay-at-the-Pump Auto Liability Insurance	4-181
	Impacts	4-187
D.	Strategy: Reduce Transportation Related Emissions	4-188
	1. Policy: Implement a Vehicle Emissions Check Program	4-191
	Impacts	4-193
	2. Policy: Continue Phased-In Implementation of Vapor Recovery at Gas Stations	4-197
	Impacts	4-198
	3. Policy: Adopt Low Emissions Vehicle Standards	4-201
	Impacts	4-205
	4. Policy: Promote Incentives for Alternative Transportation Fuels, Including Electric Vehicles	4-205
E.	Strategy: Internalize Costs of Transportation More Fully through Transportation Energy Taxation	4-206
	1. Policy: Review and Revise State Tax Policy to More Fully Internalize the Cost of Transportation	4-207
	Impacts: Shift Roadway Construction/Maintenance Funding from Property Tax to Motor Fuels Tax	4-209
	Impacts: Shift Police/Fire Transportation Funding from Property Tax to Motor Fuels Tax	4-212
	Impacts: Remove Sales Tax Exemptions on Motor Fuels	4-215
	Remove Parking Subsidies	4-215
	Impacts: Combined Results of Shifting Hidden Costs to Motor Fuels Taxes	4-215
	2. Policy: Support Phase-Out of Federal Policies Giving Advantages to Traditional Fuels and Projects; Equalize Market Opportunities for New Technologies and Alternative Transportation Fuels	4-219
	3. Policy: Shift Registration and License Fees to Motor Fuels Taxes	4-220
	Impacts	4-223

4.	Policy: Support Commuter Buses with a Motor Fuels Tax.....	4-223
	Impacts.....	4-224
5.	Policy: Consider Establishing a Vermont Feebates Program.....	4-224
	Impacts.....	4-229
III.	BUILDINGS AND EQUIPMENT.....	4-230
A.	Strategy: Improve Efficiency and Indoor Air Quality in New Homes.....	4-230
1.	Policy: Implement Residential Building Energy Standards for New Construction.....	4-230
	Rationale.....	4-231
2.	Policy: Statewide Residential New Construction DSM Program for Premium Homes.....	4-232
	Rationale.....	4-233
3.	Policy: Increase Efficiency of New Manufactured Housing.....	4-234
	Rationale.....	4-235
4.	Policy: Expand the Vermont Home Energy Rating System.....	4-235
	Rationale.....	4-236
5.	Impacts of Residential New Construction Policies.....	4-239
B.	Strategy: Improve the Efficiency of Vermont's Existing Housing Stock.....	4-239
1.	Policy: Time-of-Sale Energy Efficiency Requirement.....	4-240
	Rationale.....	4-241
2.	Policy: DSM Program Support for a Time-of-Sale Standard.....	4-241
	Rationale.....	4-242
3.	Policy: Discount Mortgage Rates for Energy Efficient Homes.....	4-242
	Rationale.....	4-242
4.	Policy: Promote Energy Efficient Products Through a Statewide Trade Ally Program.....	4-243
	Rationale.....	4-243
5.	Policy: Diversify the Vermont Weatherization Program.....	4-245
	Rationale.....	4-245
C.	Strategy: Increase Efficiency in Commercial and Industrial New Construction.....	4-247
1.	Policy: Adopt a Commercial New Construction Energy Efficiency Code.....	4-248
	Rationale.....	4-248
2.	Policy: Statewide Commercial and Industrial DSM Programs.....	4-252
	Rationale.....	4-252
3.	Policy: Establish an Energy Efficiency Partnership and Information Clearinghouse.....	4-254
	Rationale.....	4-255
4.	Impacts of Commercial New Construction and Retrofit Policies.....	4-256
D.	Strategy: Improve Efficiency in Commercial and Industrial Facilities by Targeting Retrofits and Lost Opportunities.....	4-259
1.	Policy: Adopt a Statewide Energy Code for Commercial and Industrial Remodeling, Renovations, and Additions.....	4-259
	Rationale.....	4-260
2.	Policy: Statewide DSM Programs for Commercial and Industrial Equipment Replacement, Remodeling, and Renovation.....	4-260
	Rationale.....	4-261
3.	Policy: DSM Retrofit Programs in Transmission and Distribution Constrained Areas.....	4-262
	Rationale.....	4-262
4.	Policy: Financing Mechanisms for Cost-Effective Energy Efficiency and Renewable Energy: Performance Contracting and ESCOs.....	4-262
	Rationale.....	4-263

IV. AFFORDABILITY	4-264
A. Strategy: Promote Energy Efficiency for Low Income Housing and Affordability in an Increasingly Competitive Market.....	4-264
1. Policy: Energy Efficiency Standards for Multi-Family Rental Housing.....	4-265
Rationale	4-266
2. Policy: Energy Efficiency Services Integrated with the Fuel Assistance Program	4-267
Rationale	4-267
3. Policy: Reinvent Weatherization Services Delivery to Low Income, Multi-Family Housing.....	4-268
Rationale	4-270
4. Policy: Encourage Development of a Consumers' Cooperative or Consumerco	4-270
Rationale	4-271
5. Policy: Establish a Statewide Affordability Program to Take Effect When Vermont Initiates Retail Competition	4-271
V. GOVERNMENT ENERGY USE AND ENERGY POLICY	4-272
A. Strategy: Improve Government's Energy Use, Programs, and Policy.....	4-272
1. Policy: Government Energy Use in Buildings, Equipment, and Vehicles.....	4-272
Rationale	4-273
2. Policy: Government Energy Planning	4-280
Rationale	4-283
3. Policy: Public Education and Information.....	4-288
Rationale	4-289
CHAPTER 5 - CHARTING VERMONT'S ENERGY FUTURE: THE COMPOSITE POLICY CASE	5-1
I. OVERVIEW: COMPOSITE CASE POLICIES AND THEIR IMPACTS	5-3
II. ENERGY IMPACTS	5-7
III. SUSTAINABILITY IMPACTS.....	5-10
IV. EFFICIENCY IMPACTS	5-12
V. SECURITY IMPACTS.....	5-14
VI. ECONOMIC IMPACTS.....	5-14
VII. AFFORDABILITY IMPACTS	5-15
VIII. ENVIRONMENTAL IMPACTS.....	5-15
IX. CONCLUSION	5-18
REFERENCES	R-1
APPENDIX 1 - ABBREVIATIONS LIST and GLOSSARY	A1-1
APPENDIX 2 - SUMMARY OF SELECTED STATE STATUTES RELATED TO ENERGY PLANNING EFFORTS	A2-1
APPENDIX 3 - ENERGY INFORMATION AVAILABLE TO THE PUBLIC FROM THE VERMONT DEPARTMENT OF PUBLIC SERVICE.....	A3-1
APPENDIX 4 - ENERGY PLANNING BY STATE AGENCIES, REGIONAL PLANNING COMMISSIONS, AND TOWNS	A4-1
