

Technical Analysis of a 100% Renewable or Clean Energy Standard – Draft Results Technical Workshop

October 10th, 2023 12pm-3pm

Location:

This meeting will be hosted on the GoToWebinar Platform. [Register here](#) to receive meeting details.

Objectives:

This webinar, hosted by the Department of Public Service in partnership with their technical consultant, Sustainable Energy Advantage, will discuss draft results from modeling work done to explore possible modifications to Vermont's Renewable Energy Standard. This work is being conducted in collaboration with the Department's [Stakeholder Advisory Group](#).

- **Who should attend?** The workshop is geared towards technical stakeholders who are interested in getting deep into the weeds on modeling outputs, data sets, and scenarios related to the draft results. Interested in attending? [Register here](#).
- **What to expect:** The workshop will include an overview of the modeling effort and its scope, a presentation of the draft results, and opportunities for stakeholders to review and ask questions about the draft results.
- **Preparation:** Interested stakeholders may want to review materials from previous meetings of the Stakeholder Advisory Group, [available on the Department's website](#).

Agenda

- 12:00 Welcome and Context (*Department of Public Service*)
- 12:30 Overview of Modeling Effort & Scope (*Sustainable Energy Advantage*)
 - Scope, Approach, and Deliverables
 - Policy & Market Context
 - How to use this model and interpret results
 - What can the model do? What can't it do?
 - Question & Answer
- 1:15 Break
- 1:30 Draft Results (*Sustainable Energy Advantage*)
 - Scenarios, Definitions, and Assumptions
 - Overview of Results
 - Question & Answer
- 2:45 What's next? (*Department of Public Service*)
 - Next steps in Department review of renewable electricity policies & programs
 - November workshop
- 3:00 Adjourn
