The Vermont Department of Public Service (“Department”), which represents the public interest in utility cases before the Vermont Public Utility Commission (“Commission”), is soliciting proposals, through this Request for Proposals (“RFP”), for qualified experts in regulatory accounting and compliance, infrastructure resilience, technological feasibility, risk management, and more to assist the Department in its review of Green Mountain Power Corporation’s (“GMP” or “Company”) Zero-Outage Initiative (“Petition”), filed with the Commission on October 9, 2023, in Case No. 23-3501-PET. GMP filed this Petition pursuant to its Commission approved Multi-Year Regulation Plan (“MYRP”), which also sets a path for GMP’s customer rates.

The Department seeks an expert witness to assist the Department in its review of GMP’s Petition, which will ultimately be reviewed by the Commission. Specifically, the Department seeks assistance in reviewing and scrutinizing:

- (1) The cost-effectiveness of the proposed capital expenditures in the Petition, from both a ratepayer and a societal perspective. The ratepayer perspective assessment should consider whether the electric-system benefits of reducing storm-related and other outages to near-zero justify the electric system costs. The societal perspective should estimate societal benefits such as “avoided economic impacts,” “greater safety,” and “other tangible and intangible benefits” as well as evaluate any incremental costs to ratepayers and/or society that are proposed to achieve these benefits. The evaluation should also include recommendations for defining, measuring, and valuing grid “resilience,” including differentiating it from reliability as typically measured through indices such as CAIDI, SAIDI, and SAIFI;
- (2) The potential impact of the Petition on customer rates, including with regards to low-income customers and small businesses, customer benefits, and the reasonableness of such impacts;
- (3) GMP’s risk management strategies for extreme weather events and other high impact threats, including (a) the likelihood and severity of future storms and other threats, and (b) GMP’s ability to adequately address these storms and threats through its Petition;
- (4) The resilience of GMP’s proposed infrastructure upgrades to ensure the Company is implementing technologies and designs that enhance the overall resilience of the electric grid against various types of storms and threats;
- (5) GMP’s compliance with existing regulations, standards, and best practices related to infrastructure development, safety, environmental impact, and its other plans including its MYRP, Climate Plan, and Integrated Resource Plan;
- (6) The technological feasibility and reasonableness of the proposed upgrades in the Petition, including whether GMP’s chosen technologies are effective, reliable, and

the best fit for achieving the desired outage reductions at least cost;

(7) The environmental impact of the proposed projects in the Petition, including a review of whether or not GMP's proposed practices will be environmentally sustainable;

(8) GMP's plans to coordinate with other State agencies and related entities, such as emergency management, environmental agencies, Regional Planning Commissions, FEMA, etc.;

(9) GMP's plans for customer outreach and education regarding GMP's proposed capital expenditures, including ensuring that (a) customers understand the purpose, potential benefits, and potential impacts of these projects proposed under the Petition, and (b) customers know where and who to contact for support;

(10) GMP's plans for a transparent process for customer engagement including public input as well as GMP's consideration of the concerns and suggestions of the communities it serves;

(11) GMP's long-term plan to ensure that the proposed Petition aligns with broader energy and infrastructure policy and planning for the state and region (e.g., Vermont 2022 Comprehensive Energy Plan, 2021 Climate Action Plan, 2023 State Energy Security Plan, State and local Hazard Mitigation Plans); and

(12) GMP's plans for use of federal, state, and other funding resources to offset the costs of the solutions proposed in the Petition.

The work for this proceeding is anticipated to take place primarily from November 15, 2023, through November 15, 2024. The contract period will begin when a contract is executed and end one year from that date.

Proposals are due by 4:30 p.m., Tuesday, November 14, 2023, with the goal of finalizing a contract as soon as practicable. The selected Respondent should be available to start immediately thereafter. A signed original, electronic copy of the proposal must be delivered to the Department. Proposals and questions should be sent to:

Erin.Brennan@vermont.gov and Alexander.Wing@vermont.gov

Scope of Services

The Department anticipates that the Respondent hired in connection with this RFP will support the legal, consumer affairs, and technical staff of the Department by providing expertise and technical assistance regarding cost-of-service ratemaking.

The selected Respondent is expected to provide assistance to the Department and participate in a

contested administrative proceeding before the Commission, which has ultimate authority over whether to approve GMP's Petition. The selected Respondent's preparation for, and participation in, the contested proceeding is expected to include: preparing discovery questions and responses, drafting prefiled testimony to be submitted to the Commission, and offering live testimony to the Commission.

Respondent will perform a thorough review and analysis of GMP's Petition.

The Respondent will be experienced in analyzing the operations, books, and records of utility companies for the purpose of setting just and reasonable rates, and be qualified and prepared to render expert testimony, regarding: (a) components (1)-(12) provided on page two - three of this RFP; (b) appropriate accounting standards and practices for an investor-owned electric distribution utility; (c) standards for prudence and cost recoverability; (d) Vermont and Federal Energy Regulatory Commission ("FERC") approved cost-of-service cost methodologies for electric distribution utilities, and (e) energy justice and equity.

Respondent shall be qualified to prepare and render expert testimony, and be cross-examined, with respect to all of the issues addressed in this RFP.

Deliverables

The final deliverables and work product of the Respondent chosen through this RFP will consist of a written report (to be prepared in the form of written prefiled testimony, including supporting detail) covering the review and examination of GMP's proposed Petition. The review should document the scope of the Respondent's review and should specify areas of inquiry, responses, and resolution (if any). The report should specify recommended disallowances and the reasons supporting them. The report should also make any further recommendations, as necessary, based on information learned during the course of the consultant's review.

The following items will be required, as necessary, through the course of litigation:

2. Discovery requests and evaluation of the responses, including assistance with preparation for depositions, if necessary;

4. Responses to discovery relating to the written testimony;
5. Cross-examination testimony and assistance with cross-examination of opposing witnesses;
6. Proposed findings of fact and other assistance with initial and reply briefs in support of the Department's case.

Respondent should be prepared to provide multiple electronic (original source applications and pdf) and hard copies of written products intended to be filed with the Department and the Commission. Respondent will be expected to be available for teleconferencing discussions with

the Department and GMP. Respondent may be required to maintain the confidentiality of documents provided by GMP.

Schedule

Respondent selected for this work must be able to begin work upon award of the contract and to prepare for meeting the timelines established by the Commission in the anticipated proceeding. As of the posting of the RFP, a full litigation schedule has not yet been set.

Setting

Respondent will be expected to write, and assist Department staff in preparation of, written discovery requests and possibly deposition questions. In addition, the Respondent will be expected to provide written testimony and exhibits presenting the results of their work, and to defend that work through testimony, discovery responses, depositions, and cross-examination. Respondent will be expected to testify at evidentiary hearings. It is not known at this time whether hearings will be held virtually or in-person, but the Respondent should expect that travel for evidentiary hearings may be required. Assistance with preparation of cross-examination, briefs, and proposed findings may also be required.

A. Requirement to Have a Single Audit: The Subrecipient will complete the Subrecipient Annual Report annually within 45 days after its fiscal year end, informing the State of Vermont whether or not a Single Audit is required for the prior fiscal year. If a Single Audit is required, the Subrecipient will submit a copy of the audit report to the granting Party within 9 months. If a single audit is not required, only the Subrecipient Annual Report is required.
